POMPEII SMOOTH

VEG TAN LEATHER

This aniline leather is strong, pliable
and fully conditioned with a special
treatment of oils, waxes and tallows.

cognac

viola

An excellent slick surface feel, along with a light pull up creates a beautiful two-tone effect and will become lighter in areas of heavy use. The natural patinas that develop will only get better with age, taking on a beautiful aged look over the years.

taupe

Stocked in a weight of 3.5oz to 4.0oz , this leather is also available in small bespoke orders of weights ranging from 4oz to 6oz.

rosso antico

cognac

steel

FULLY CONDITIONED

With natural vegetable tanned leathers, depending on the environment and frequency to which the leather is exposed, you can expect such leathers will darken if exposed to water and oils, dirt, denim, etc, whereas they will lighten when exposed to extended sunlight. It is best to avoid direct heat as this may cause narrowing or cracking of the leather's surface.

Leather is a natural product. Distinctive markings and nuances in its texture and colour are natural in occurrence and a testament to its authenticity.

Cuttings for approval (CFAs) are recommended for this leather. Expect slight color variation from dye lot to dye lot.

NOTE: Due to color variations on different monitors and color printers, before making exact color and texture matches, we recommend that you request an actual sample to ensure proper color representation as many monitors and printers cannot print colors accurately. CTL Leather is not responsible for color selections made from this lookbook.
